

PROFESSIONAL SUMMARY

B. Tech Computer Science and Engineering (Data Science) student with practical experience in machine learning, deep learning, computer vision, and AI application development. Skilled in Python, Java, SQL, TensorFlow, PyTorch, FastAPI, and React.js, with experience developing end-to-end projects involving OCR-free document retrieval, deep learning-based plant disease detection, and real-time gesture recognition.

---

- SKILLS
- Programming Languages: C, Java, Python, R, SQL

- Machine Learning & Computer Vision: TensorFlow, Keras, PyTorch, OpenCV, MediaPipe, FAISS

- Frameworks & Technologies: FastAPI, React.js, Streamlit, Docker, n8n, Tableau, PyAutoGUI, pycaw
- 

TRAININGS & INTERNSHIPS

InAmigos Foundation

AI Web Development Intern

Participated in brainstorming sessions focused on improving website UI/UX and enhancing the overall user experience.

Analyzed how website elements and design decisions can influence consumer interaction and engagement.

Explored the integration of AI-powered features into websites to provide more useful and personalized experiences for consumers.

online

May 2026 – Jun 2026

Talent Trek

Artificial Intelligence Intern

Completed hands-on training in Machine Learning and Deep Learning, covering fundamental concepts and neural network architectures.

Developed and implemented a neural network project, applying concepts of model training and evaluation to a practical problem.

online

Aug 2025 – Nov 2025

---

PROJECTS

ColPali: OCR-Free Document Retrieval

Developed an OCR-free multimodal document retrieval system using Qwen2-VL, FAISS, FastAPI, and React.js.

Implemented semantic search using vision-language embeddings to retrieve relevant document pages while preserving visual context, including tables, charts, and document layouts.

Built an end-to-end PDF retrieval pipeline supporting document upload, page-level indexing, embedding-based search, and real-time retrieval through a web interface.

Jun 2026

Plant Disease Detection System

Developed a deep learning-based plant disease detection system using TensorFlow/Keras and OpenCV, achieving 95%+ accuracy across a dataset of 100,000+ images.

Deployed the application using Streamlit with multilingual support for Telugu, Hindi, and English.

Integrated disease detection with remedy recommendations to provide actionable guidance for farmers and home gardeners.

Feb 2025

Gesture-Based System Control

Developed a real-time hand gesture recognition system using Python, OpenCV, and MediaPipe for touchless system control.

Implemented gesture-based controls for system volume, brightness, scrolling, navigation, zooming, and application management.

Integrated system-level controls using PyAutoGUI, pycaw, and screen brightness control to enable touchless interaction with Windows applications.

EDUCATION

B. Tech, Mahatma Gandhi Institute of Technology, Hyderabad

XII (MPC), Amogha Jr college

X, Vignana Jyothi Public School

2024 - 2027

2022 - 2023

2020 - 2021

---

ACHIEVEMENTS & CERTIFICATIONS

2nd Place – AI Hackdays Hackathon (2025)

Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate — Oracle

Introduction to Generative AI Studio — Google Cloud

Python Using AI Workshop — AI for Techies
